DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Claims 1-6, 8 and 9 are objected to because of the following deficiencies:

In claim 1, line 27, the word “front” should be changed to --back-- in order to correct an apparent oversight.

In claim 5, lines 4 and 5, the recitation of “the slots (40)” lacks proper antecedent basis.

In claim 6, line 2, the reference numeral “7” should be changed to --6--.

Claims 1-6, 8 and 9 distinguish over the prior art of record and thus would be allowable if the above objections were overcome in applicant’s next response to this Office action.

The following is an examiner’s statement indicating allowable subject matter:

The overall combination of structure of an apparatus for distributing powders on a support in a predetermined pattern as claimed including the closed continuous belt having a plurality of perforations arranged according to a predetermined pattern and the means for controlling a supply and delivery of powders through the perforations and for keeping the continuous belt clean as defined is not taught nor suggested by the prior art of record.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
